SEMINARIO

Reimagining the Rule of Law in the Digital dimension of the European Union

The seminar explores the Rule of Law in the European Union from complementary theoretical and practical perspectives. The first presentation examines the evolution and perception of the Rule of Law within the EU legal order, focusing on its relationship with the Rechtsstaat tradition, its axiological foundations and the role of the Court of Justice in giving the concept increasingly concrete and operational meaning. The second presentation approaches the Rule of Law as a condition for EU public governance, focusing on access to EU funding and conditionality mechanisms. The seminar concludes by considering digitalisation and algorithmic governance, with particular attention to transparency, accountability, human oversight and effective review.

INTRODUCTION

Edoardo A. Rossi - University of Urbino, DIGEOMETRY Co-coordinator

Perception of the Rule of Law concept in EU: evolution, axiology, practice

Barbara Janusz-Pohl - Adam Mickiewicz University, Poznań

The Rule of Law as a Condition of European Union Public Governance

Katarzyna Kokocinska - Adam Mickiewicz University, Poznań

DISCUSSION

Andrea Zampini - University of Urbino

Il seminario rientra tra le attività del Modulo Jean Monnet
DIGEOMETRY: DIGital EurOpe for Multi-Speed intEgraTion
and democRacY.
